Industrial QUALITY CONTROL

Vol. XI, No. 9, Part II

June, 1955

INDEX TO

VOLUMES I-X

JULY 1944 - MAY 1954

Price: 50 cents

AMERICAN SOCIETY FOR QUALITY CONTROL

CONTENTS

Foreword 4

Part I—Topical Classifications

1. Aircraft Industries—Case Histories 5
2. American Society for Quality Control 5
3. Administrative Applications of Quality Control 5
4. Analysis of Experimental Results 5
5. Analysis of Variance 5
6. Average and Range Control Charts 6
7. Automotive Industries—Case Histories 6
8. Basic Concepts of Quality Control 6
9. Ceramic Industries—Case Histories 7
10. Chemical Industries—Case Histories 7
11. Control Charts—Miscellaneous 7
12. Correlation 7
13. Defects Control Chart 8
14. Design of Experiments 8
15. Editorials 8
16. Electronic and Electrical Industries—Case Histories 9
17. Frequency Distribution and Histogram 9
18. Gaging and Inspection 9
19. History and Future of Quality Control 9
20. Installation of Quality Control Programs 10
21. Job Shop—Case Histories 10
22. Mechanical Industries—Case Histories 10
23. Metal Industries—Case Histories 10
24. Military Applications of Quality Control 10
25. Non-Commercial Applications of Quality Control 11
26. Operations Research 11
27. Optical Industries—Case Histories 11
28. Organization of Quality Control Programs 11
29. Paper Industries—Case Histories 11
30. Per Cent Defective Control Charts 11
31. Precision of Instruments and Testing Methods 12
32. Quality Assurance 12
33. Quality Level Certification 12
34. Quality Mindedness 12
35. Reject Limits and Narrow-Limit Gaging 12
36. Reporting of Quality Results 12
37. Sampling
    - A. Administration of Sampling Plans 12
    - B. Continuous Production Sampling Plans 13
    - C. Sampling Plans and Problems—Miscellaneous 13
    - D. Sequential Sampling 13
    - E. Single and Double Sampling 13
    - F. Variables Sampling 13
38. Significance Tests 14
39. Statistical Techniques—Miscellaneous 14
40. Tables, Charts and Computing Devices 14
41. Textile Industries—Case Histories 15
42. Tolerances and Process Capability 15
43. Top Management Views on Quality Control 15
44. Training and Education 16
45. Vendor-Consumer Relations 16
46. Visual Inspection 16
47. Miscellaneous 16

Part II—Authors and Contributors

Foreword

This ten-year cumulative index to *Industrial Quality Control* is a logical sequel to the annual index published serially with each separate volume of the journal. As such, it provides a composite reference intended to make it easier to answer two pertinent and personal questions:

(1) "Do the first ten volumes of IQC contain anything bearing on the topic of current interest to me?"

(2) "If so, what and where is it?"

Part I lists, by topical classification, papers and articles published in these ten volumes. Although the classification system adopted is not the only way material in these ten volumes could be codified, it is believed to be sufficiently simple yet inclusive so that titles relating to a particular area of interest can be quickly located. To this end, many titles appear in more than one classification.

Part II lists alphabetically all authors whose contributions appear in Part I. Each author is cross-referenced to those classifications in Part I where his contributions are listed by title.

The work of compiling this index was done with the advice and direction of the Editorial Board by Frank M. Gryna, Jr., Assistant Professor of Statistical Quality Control, University College, Rutgers University.

Mason E. Wescott
Chairman, Editorial Board

All back issues of Volumes I-X are available at $1.00 per copy; $6.00 per volume. Please make remittance in U. S. funds payable to the American Society for Quality Control, Inc. and send your order to:

American Society for Quality Control
Room 563
50 Church St.
New York 7, N. Y.

PART I--TITLES AND AUTHORS BY TOPICS

(Following each title are three reference numbers; viz., IV; 3:11. This sequence means "Vol. IV, No. 3, page 11." Also Vol. I, Nos. 1-6 are the issues of July 1944 through May 1945; Vol. II, Nos. 1-6 are July 1945-May 1946, etc.)

1. AIR[illegible] INDUSTRIES—CASE HISTORIES

Statisti[illegible]ity Control at Bell Aircraft Corporation.
James [illegible]ger. 1; 2: 3.
Use of [illegible]relation in Quality Control.
Peter P. DiPaola. II; 1: 10.
Receiving Inspection Control.
O. W. Hitchcock. II; 4A: 17.
A Brief Survey of the Practicability of MIL-STD-105A within the Aircraft and Associated Industries.
Fay Carlson. VIII; 3: 28.
Quality Control as a Methods Improvement Function in Automotive and Aircraft Parts Manufacturing.
E. F. Gibian. X; 2: 22.

2. AMERICAN SOCIETY FOR QUALITY CONTROL

The Place of the American Society in Modern Quality Control.
Wade R. Weaver. V; 6: 18.
Organization—American Society for Quality Control.
Ralph E. Wareham. VI; 6: 45.
Directions for ASQC.
J. M. Juran. VIII; 3: 30.
Building a Stable Membership.
Elbert T. Terhune. IX; 1: 40.

3. ADMINISTRATIVE APPLICATIONS OF QUALITY CONTROL

Control Charts Locate Errors.
James M. Ballowe. II; 4A: 17.
Sampling Plans for Verifying Clerical Work.
H. L. Jones. III; 4: 5.
Quality Control in Relation to Time Study.
Ray W. Good. IV; 2: 13.
Quality Control—Sales.
William Kerr. V; 3: 22.
Quality Control Stimulates Thinking.
Charles D. Wiman. V; 4: 5.
The Application of Quality Control to Administrative Problems.
Charles A. Bicking. VI; 6: 21.
Air Transportation Finds New and Lucrative Uses for SQC.
Dale L. Lobsinger. VI; 6: 76.
A Technique for Adjusting Sales Predictions to Actual Sales Trends: A Method of Inventory Control.
Mrs. Frances B. Newman. VII; 6: 29.
Some Aspects of Quality Control as Applied to Clerical Operations.
Bennet B. Murdock. VII; 6: 39.
Statistical Cost Control in the Paper Industry.
Carl E. Noble. IX; 6: 42.
Probability Statistics Applied to Tax Returns.
A. C. Rosander. IX; 6: 46.
Some Problems in Sampling Accounting Records.
Howard L. Jones. X; 3: 6.
Statistical Techniques for Managerial Control.
Howard L. Jones. X; 6: 18.
Some Administrative Attributes of SQC.
Dale L. Lobsinger. X; 6: 20.

4. ANALYSIS OF EXPERIMENTAL RESULTS

Statistical Quality Control in the Chemical Laboratory.
Grant Wernimont. III; 6: 5.
Statistical Techniques for Production Control and Plant Scale Experimentation.
Charles A. Bicking. III; 6: 11.
Quality Control in the Synthetic Rubber Industry.
Mortimer D. Gross. IV; 3: 11.
Statistical Methods in Plastics Research and Development.
W. L. Gore. IV; 2: 5.
Analysis of Variance: Part III Practical Examples.
B. A. Griffith, A. E. R. Westman, and B. H. Lloyd. IV; 6: 19.
Variables Control Chart in Production Research.
Ellis R. Ott. VI; 3: 30.
Application of Statistics to Drug Manufacture.
Roland H. Noel and Martin A. Brumbaugh. VII; 2: 7.
Statistical Methods in Chemical Development.
Charles A. Bicking. VIII; 4: 9.
Rough-and-Ready Statistical Tests.
W. Allen Wallis. VIII; 5: 35.
A Production Experiment Using Attribute Data.
Fred Ennerson, Ralph Fleischmann, Doris Rosenberg. VIII; 5: 41.
The Interpretation of Chemical Data.
W. J. Youden. VIII; 6: 90.
Production Research in the Manufacture of Hearing Aid Tubes.
Doris Rosenberg and Fred Ennerson. VIII; 6: 94.
The Role of Statistics in Increasing the Productivity of Industrial Research.
Charles A. Bicking. IX; 4: 8.
The Statistics in a Gear-Test Program.
B. B. Day and F. R. Del Priore. IX; 5: 16.
A Production Experiment with Mechanical Assemblies.
Ellis R. Ott. IX; 6: 124.
On the Design of Experiments.
D. B. Delury. X; 4: 24.

5. ANALYSIS OF VARIANCE

Control Charts vs the Analysis of Variance in Process Control by Variables.
Cecil C. Craig. III; 4: 14.
Let's try Analysis of Variance.
James A. Fizzell. IV; 4: 22.
Analysis of Variance: Part I—Variance, the F Test, and the Analysis of Variance Table.
B. A. Griffith, A. E. R. Westman, and B. H. Lloyd. IV; 5: 20.
Analysis of Variance: Part II—Analysis of a Two-Way Layout for Row, Column, and Interaction Effects.
B. A. Griffith, A. E. R. Westman, and B. H. Lloyd. IV; 6: 13.

Analysis of Variance: Part III—Practical Examples.
B. A. Griffith, A. E. R. Westman, and B. H. Lloyd. IV; 6: 19.
The Foreman's View of Quality Control—Part II.
Wade R. Weaver. V; 3: 19.
Applications of Statistics to Drug Manufacture.
Roland H. Noel and Martin A. Brumbaugh. VII; 2. 7.
Statistical Methods in Chemical Development.
Charles A. Bicking. VIII; 4: 9.
The Interpretation of Chemical Data.
W. J. Youden. VIII; 6: 90.
Probability Statistics Applied to Tax Returns.
A. C. Rosander. IX; 6: 46.
The Statistical Approach to Bulk Sampling Problems.
B. H. Lloyd. IX; 6: 113.
Principles of Sampling in the Chemical Field.
Martin A. Brumbaugh. X; 4: 6.
On the Design of Experiments.
D. B. Delury. X; 4: 24.
Analysis of Variance When the Numbers of Observations in the Subgroups are Unequal.
Charles R. Hicks. X; 6: 52.

6. AVERAGE AND RANGE CONTROL CHARTS

The Introduction of Quality Control at Colonial Radio Corporation.
George V. Herrold. I; 1: 4.
Applications of Quality Control at Bausch and Lomb Optical Company.
William Bidlack, Edward R. Close, and Joseph Warren. II; 1: 3.
Fundamentals of Quality Control.
Lloyd A. Knowler. III; 1: 7.
Quality Control by Statistical Methods Applied to Line Production.
E. F. Gibian. III; 2: 7.
Process Control Methods.
Bernard Hecht. IV; 1: 7.
Quality Control in the Synthetic Rubber Industry.
Mortimer D. Gross. IV; 3: 11.
Quality Control in Raw Materials Acceptance and Chemical Specifications.
James A. Mitchell. IV; 3: 16.
Use of Statistical Methods for Time Study of Batch Processes.
W. S. Traylor. IV; 4: 18.
Historical Note.
C. C. Van Vechten IV; 6: 5.
The Foreman's View of Quality Control—Part I
Wade R. Weaver. V; 2: 6.
Quality Control Charts for $\bar{X}$ and R Adjusted for Within-Subgroup Pattern.
B. H. Lloyd and A. E. R. Westman. V; 5: 5.
Operating Characteristics of Average and Range Charts.
Henry Scheffé. V; 6: 13.
The Case of the Perjured Control Chart.
V. E. McCoun. V; 6: 20.
Use of Control Chart Techniques in Making a Quality Audit—Part I; Part II.
Bonnie B. Small. VI; 1: 15; VI; 2: 11.
Quality Reports to Management.
August B. Mundel. VI; 3: 8.
Variables Control Chart in Production Research.
Ellis R. Ott. VI; 3: 30.
The Application of Quality Control to Administrative Problems.
Charles A. Bicking. VI; 6: 21.
Quality Control at the Weatherhead Company.
J. Frederick Verigan. VI; 6: 36.
Applications of Statistics to Drug Manufacture.
Roland H. Noel and Martin A. Brumbaugh. VII; 2: 7.
Statistical Quality Control in the Manufacture of Pharmaceuticals.
R. H. Noel. VII; 2: 14.
Ford's Interest in Statistical Quality Control.
William H. Smith and C. R. Burdick. VII; 3: 6.
On the Evaluation of Raw Stock Dyeing.
A. G. Klock and C. W. Carter. VII; 3: 15.
Quality Control in the Forging Industry.
D. G. Browne. VII; 3: 25.
Operating Characteristics of R Charts.
Acheson J. Duncan. VII; 5: 40.
Statistical Quality Control in the Foundry.
George Ver Beke. VII; 6: 82.
Production Research in the Manufacture of Hearing Aid Tubes.
Doris Rosenberg and Fred Ennerson. VIII; 6: 94.
The Operating Characteristic of the Average Chart.
Edgar P. King. IX; 3: 30.
How to Detect the Type of Assignable Cause: Part I—Clues for Particular Types of Trouble.
Paul S. Olmstead. IX; 3: 32.
Foundry Quality Control.
A. A. Evans. IX; 4: 12.
How to Detect the Type of Assignable Cause: Part II—Procedure When Probable Cause is Unknown.
Paul S. Olmstead. IX; 4: 22.
Quality Control an Enigma . . . .?
William K. Wood. IX; 5: 14.
Special Applications for Quality Control Charts.
Wyatt H. Lewis. IX; 6: 77.
Quality Control at Timken-Detroit Axle Company.
James Rayer, Sr. IX; 6: 102.
Some Influences of Paper Machine Design and Operation of Variability of Paperboard.
Charles A. Bicking and Richard Trelfa. X; 2: 17.
The Use of Average and Range Charts to Control Material Consumption.
Howard R. Bolton. X; 2: 50.
Probability Limits for the Average Chart When Process Standards are Unspecified.
E. P. King. X; 6: 62.

7. AUTOMOTIVE INDUSTRIES—CASE HISTORIES

Ford's Interest in Statistical Quality Control.
William H. Smith and C. R. Burdick. VII; 3: 6.
Applying the Group Chart for $\bar{X}$ and R.
D. F. Boyd. VII; 3: 22.
Quality Control—A Tool for Human Engineering.
Roscoe Smith. VII; 4: 14.
Problems of Receiving Inspection and the Assembly Line.
William H. Smith. IX; 5: 8.
Quality Control As a Methods Improvement Function In Automotive and Aircraft Parts Manufacturing.
E. F. Gibian. X; 2: 22.
The Use of Average and Range Charts to Control Material Consumption.
Howard R. Bolton. X; 2: 50.

8. BASIC CONCEPTS OF QUALITY CONTROL

Some Axioms of Quality Control.
William A. Kerr. I; 1: 3.
Statistical Quality Control—What It Is and What It Does.
William B. Rice. II; 4: 6.
The Money Value of Industrial Statistics.
Paul Peach. II; 4A: 18.

Implications of Statistical Quality Control.
Ralph E. Wareham. II; 4A: 18.
Fundamentals of Quality Control.
Lloyd A. Knowler. III; 1: 7.
Management Needs Quality Control.
George J. Meyers, Jr. III; 6: 23.
Quality Control Leads the Way.
A. E. R. Westman. IV; 6: 6.
The Statistical Viewpoint.
A. T. Craig. IV; 6: 30.
The ABC of SQC.
A. G. Dalton. V; 4: 9.
A Talk With The Foreman about Quality Control.
H. E. Thompson. VI; 6: 29.
Important Advantages of Statistical Quality Control in Manufacture.
A. G. Dalton. VI; 6: 35.
Quality Control in Six Minutes.
A. G. Klock and C. W. Carter. VII; 2: 20.
Some Basic Concepts of Quality Control.
George D. Edwards. IX; 1: 9.
Control Charts May Be All Right, But—.
Frank Proschan. IX; 6: 56.

9. CERAMIC INDUSTRIES—CASE HISTORIES

Application of Statistical Methods to the Inspection of Porcelain Enamel.
L. S. Kauffman. III; 3: 13.

10. CHEMICAL INDUSTRIES—CASE HISTORIES

The Effect of a Number of Variables on a Quality Characteristic.
Casper Goffman. II; 4: 3.
Quality Control in Chemical Manufacture.
James A. Mitchell. II; 4A: 14.
Quality Control by Statistical Methods.
G. H. Cassidy. II; 4A: 15.
Accuracy of Measurement.
Maurice Milbourn. II; 4A: 15.
How Statistics Contributes to Quality Control in the Chemical Industry.
Charles A. Bicking. III; 4: 17.
Statistical Quality Control in the Chemical Laboratory.
Grant Wernimont. III; 6: 5.
Statistical Techniques for Production Control and Plant Scale Experimentation.
Charles A. Bicking. III; 6: 11.
Statistical Methods in Plastics Research and Development.
W. L. Gore. IV; 2: 5.
Quality Control in the Synthetic Rubber Industry.
Mortimer D. Gross. IV; 3: 11.
Quality Control in Raw Materials Acceptance and Chemical Specifications.
James A. Mitchell. IV; 3: 16.
Use of Statistical Methods for Time Study of Batch Processes.
W. S. Traylor. IV; 4: 18.
Chemistry Finds Uses for Quality Control.
Everett V. Lewis. V; 1: 11.
Applications for Statistics to Drug Manufacture.
Roland H. Noel and Martin A. Brumbaugh. VII; 2: 7.
Statistical Quality Control in the Manufacture of Pharmaceuticals.
R. H. Noel. VII; 2: 14.
Quality Control in the Production of Blended Whiskey.
David R. Peryam. VII; 3: 17.
Application of Statistical Techniques to the Physical Testing of Plastics.
C. H. Adams. VII; 4: 17.
Statistical Methods in Chemical Development.
Charles A. Bicking. VIII; 4: 9.
The Interpretation of Chemical Data.
W. J. Youden. VIII; 6: 90.
The Extra Man in the Pilot Plant.
Frank W. Wehrfritz. IX; 2: 9.
Special Applications for Quality Control Charts.
Wyatt H. Lewis. IX; 6: 77.
The Use of Statistics in Food Processing.
Stephen Harrison. X; 2: 26.
Principles of Sampling in the Chemical Field.
Martin A. Brumbaugh. X; 4: 6.
Effect of Measurement Error on Chemical Process Control.
Carl A. Bennett. X; 4: 17.

11. CONTROL CHARTS—MISCELLANEOUS

New Developments: Control Charts for Nonsymmetrical Distributions.
I; 2: 10; I; 3: 9.
Control Chart for Determining Tool Wear.
Joseph Manuele. I; 6: 7.
Limits for Control Charts.
Preston C. Hammer. II; 3: 9.
Quality Control—A Tool of Management.
Joseph Manuele. II; 4A: 4.
Limits for Control Charts—Second Article.
Preston C. Hammer. II; 6: 20.
The Difference Control Chart with an Example of Its Use.
Major Frank E. Grubbs. III; 1: 22.
Saving Time in Testing Life.
Warren R. Purcell. III; 5: 15.
Detection of Non-Random Variation When Size of Sample Varies.
Acheson J. Duncan. IV; 4: 9.
The Foreman's View of Quality Control—Part I; Part II.
Wade R. Weaver. V; 2: 6; V; 3: 19.
Quality Control Charts for $\bar{X}$ and R Adjusted for Within-Subgroup Pattern.
A. E. R. Westman and B. H. Lloyd. V; 5: 5.
Stratification Control Charts.
Irving W. Burr and Wade R. Weaver. V; 5: 10.
Probability Center Lines for Standard Deviation and Range Charts.
Churchill Eisenhart. VI; 1: 24.
Diagnosis with Diagrams—Part I; Part II.
Leonard A. Seder. VI; 4: 11; VI; 5: 7.
A Chi-Square Chart for Controlling a Set of Percentages.
Acheson J. Duncan. VII; 3: 11.
Applying the Group Chart for $\bar{X}$ and R.
D. F. Boyd. VII; 3: 22.
Variations in Conventional Control Charts.
Carl E. Noble. VIII; 3: 17.
Control of Complicated Product.
David A. Hill. VIII; 4: 18.
Control Charts Using Midranges and Medians.
Enoch B. Ferrell. IX; 5: 30.
The Technique of Preventing Defects.
Leonard A. Seder. IX; 6: 23.
A Simplified Control Chart for the Job Shop.
Harvey E. Maxwell. X; 3: 34.

12. CORRELATION

Use of Correlation in Quality Control.
Peter P. DiPaola. II; 1: 10.
The Effect of a Number of Variables on a Quality Characteristic.
Casper Goffman. II; 4: 3.

Quality Control—A Tool of Management.
Joseph Manuele. II; 4A: 4.
Statistical Techniques for Production Control and Plant Scale Experimentation.
Charles A. Bicking. III; 6: 11.
On Simple Correlation.
H. J. O'Conner. IV; 2: 9.
The Foreman's View of Quality Control—II.
Wade R. Weaver. V; 3: 19.
An Application of Statistical Quality Control Techniques to Specification Requirements.
C. L. Matz. IX; 1: 13.
Correlation of Conventional and Accelerated Test Conditions for Heater Burnouts by the Logarithmic Normal Distribution.
Richard D. Guild. IX; 3: 27.
Foundry Quality Control.
A. A. Evans. IX; 4: 12.
Using Statistics to Improve Contact Quality.
John L. Bemesderfer. IX; 4: 16.

13. DEFECTS CONTROL CHART

The Introduction of Quality Control at Colonial Radio Corporation.
George V. Herrold. I; 1: 4.
Table of Limits for Charts for Defects.
Vernon R. Grom. I; 2: 12-13.
Use of Correlation in Quality Control.
Peter P. DiPaola. II; 1: 10.
Quality Control Proves Itself in Assembly.
Wilbur L. Burns. IV; 4: 12.
Footnote to Mr. Wiman's Talk.
Howard C. Dunkel. V; 4: 8.
The Application of Quality Control to Administrative Problems.
Charles A. Bicking. VI; 6: 21.
Quality Control in Television Receiver Manufacturing.
Carl L. Gartner. VIII; 3: 7.
Some Administrative Attributes of SQC.
Dale L. Lobsinger. X; 6: 20.

14. DESIGN OF EXPERIMENTS

The Use of Statistics in the Design of Experiments.
Paul Peach. III; 3: 15.
The Technique of Experimenting in the Factory.
Leonard A. Seder. IV; 5: 6.
Balancing and Randomizing in Experiments.
Warren R. Purcell. VII; 4: 7.
Application of Statistical Techniques to the Physical Testing of Plastics.
C. H. Adams. VII; 4: 17.
A Production Experiment Using Attribute Data.
Fred Ennerson, Ralph Fleischmann, and Doris Rosenberg. VIII; 5: 41.
Production Research in the Manufacture of Hearing Aid Tubes.
Doris Rosenberg and Fred Ennerson. VIII; 6: 94.
The Role of Statistics in Increasing the Productivity of Research.
Charles A. Bicking. IX; 4: 8.
The Statistics in a Gear-Test Program.
B. B. Day and F. R. Del Priore. IX; 5: 16.
A Production Experiment with Mechanical Assemblies.
Ellis R. Ott. IX; 6: 124.
Some Aspects of Experimental Design.
Lee Crump. X; 4: 14.
Some Uses of Statistics in the Planning of Experiments.
Charles A. Bicking. X; 4: 20.
On the Design of Experiments.
D. B. Delury. X; 4: 24.

A Graphical Method of Determining a Single Sampling Plan.
A. R. Burgess. IV; 6: 25.
Effect of Sample Size on Estimating Population Percent Defective from Samples.
Irving B. Altman. VII; 5: 38.
The Frequency of Selecting Samples for Attribute Testing.
A. C. Cohen, Jr. VIII; 1: 32.
Acceptance Inspection of Purchased Material—Part I; Part II.
J. E. Palmer and E. G. D. Paterson. VIII; 2: 15; VIII; 3: 23.
A Brief Survey of the Practicability of MIL-STD 105A within the Aircraft and Associated Industries.
Fay Carlson. VIII; 3: 28.
Tables for Constructing and for Computing the Operating Characteristics of Single-Sampling Plans.
J. M. Cameron. IX; 1: 37.
An Attribute Chart for Acceptance Purposes.
Fay Carlson. IX; 4: 6.
Problems of Receiving Inspection and the Assembly Line.
W. H. Smith. IX; 5: 8.
Note on the Use of Fixed Numbers of Defectives and Variable Sample Sizes in Sampling by Attributes.
C. C. Craig. IX; 6: 83.
Quality Control in Receiving Inspection.
E. F. Graumenz. X; 2: 33.
Relationship Between Sample Size and AOQL for Attribute Single-Sampling Plans.
Irving B. Altman. X; 4: 29.

37. SAMPLING—F. VARIABLES SAMPLING

Frequency Distribution vs. Acceptance Table.
G. R. Armstrong and P. C. Clarke. III; 2: 22.
Acceptance Sampling Inspection by Variables.
Paul C. Clifford. III; 5: 12.
Nomograph for Determination of Variables Inspection Plans for Fraction Defective.
Leo J. Jacobson. VI; 3: 23.
The Hamilton Standard Lot Plot Method of Acceptance Sampling by Variables.
Dorian Shainin. VII; 1: 15.
Recent Lot Plot Experiences Around the Country.
Dorian Shainin. VIII; 5: 20.
Modification of the Lot Plot Method of Acceptance Sampling.
Robert L. Ashley. VIII; 5: 30.
A Convenient Short Cut in the Use of Lot Plot.
Richard Wilson. VIII; 5: 32.
How Effective is Lot Plot?
Indianapolis Section, ASQC and Allison Division, GMC. VIII; 5: 33.
Some Remarks Concerning the Lot Plot Plan.
C. C. Craig. X; 2: 41.
Acceptance Sampling by Variables Using the Range.
Harold J. Gulde. X; 3: 18.

38. SIGNIFICANCE TESTS

The Effect of a Number of Variables on a Quality Characteristic.
Casper Goffman. II; 4: 3.
Statistical Quality Control in the Chemical Laboratory.
Grant Wernimont. III; 6: 5.
Practical Applications of New Theory: A Review. Part I—Location and Scale: Tables.
Frederick Mosteller and John Tukey. VI; 2: 5.
Applications of Statistics to Drug Manufacture.
R. H. Noel and Martin A. Brumbaugh. VII; 2: 7.
Determining Conformance with Requirements for Lot Averages.
David H. Schwartz and Paul Kaufman. VII; 5: 18.
Determining Conformance with Requirements for Lot Averages. (Corrections and Additions.)
David H. Schwartz and Paul Kaufman. VIII; 1: 29.
An Application of Statistical Quality Control Techniques to Specification Requirements.
C. L. Matz. IX; 1: 13.

39. STATISTICAL TECHNIQUES—MISCELLANEOUS

Use of a Table of Areas of the Normal Curve in Quality Control Work.
Martin A. Brumbaugh. I; 6: 15.
New Uses for the Average Range.
G. M. Cohan. III; 6: 17.
Statistical Methods in Plastics Research and Development.
W. L. Gore. IV; 2: 5.
Some Useful Statistical Methods.

Edward A. Reynolds. X; 6: 29.

45. VENDOR-CONSUMER RELATIONS

Purchasing and Quality Control.
Stuart F. Heinritz. V; 1: 15.
Quality Level Certification.
Leo Harrington. VI; 6: 42.
Improving Vendor-Consumer Relationships.
Edward M. Schrock. VI; 6: 69.
Quality Control—A Tool for Human Engineering.
Roscoe Smith. VII; 4: 14.
The Quality Problem on Purchased Material.
Cuyler J. Hawkes. VII; 6: 66.
Military Procurement.
Rear Admiral Morton L. Ring. VIII; 1: 24.
A New System of Vendor Quality Rating.
Barton Koslow and Lawrence Lutzker. VIII; 1: 39.
Problems of Receiving Inspection and the Assembly Line.
W. H. Smith. IX; 5: 8.
Vendor Certification.
M. E. King. IX; 6: 86.
An Example of Vendor's Certification.
August B. Mundel. X; 1: 11.
Quality Control in Receiving Inspection.
E. F. Graumenz. X; 2: 33.

46. VISUAL INSPECTION

Statistical "Sleuthing" To Detect Bias in Visual Inspection.
David H. Schwartz. III; 6: 14.
Control of Visual Inspection.
Aldis S. Hayes. VI; 6: 73.
Quality Control of Visual Characteristics in Carpet Manufacture.
S. E. Lezinski. X; 1: 13.
Control Limits for Visual Quality.
Roy B. Cowin, Jr. X; 6: 36.

47. MISCELLANEOUS

The Modern Tower of Babel.
Leonard A. Seder. IV; 3: 9.
Building Morale Through Quality Control.
E. H. Robinson. VIII; 6: 63.
The Human Factor in Quality Control.
Paul J. Mundie. IX; 3: 22.
Quality Control an Enigma . . . . .?
William K. Wood. IX; 5: 14.
What's Your IQ in QC?
R. O. Swalm and C. R. Hicks. X; 6: 84.

PART II — AUTHORS AND CONTRIBUTORS

(Following each contributor are one or more arabic numbers. These numbers refer to the Topical Classifications listed on page 3 in which contributions by this individual can be found.)

Ackoff, Russell L. (26)
Acton, F. S. (40) (42)
Adams, C. H. (10) (14)
Allison Division, GMC (17) (37F)
Altman, Irving B. (24) (37A) (37E) (39) (40)
Amren, S. C. (19) (28)
Armstrong, G. R. (17) (37F)
Armstrong, William M. (23) (30)
Aroian, Leo A. (30)
Ashcroft, A. G. (41)
Ashley, Robert L. (17) (37F)

Industrial QUALITY CONTROL

INDEX TO

VOLUME XI

JULY 1954 — JUNE 1955

AMERICAN SOCIETY FOR QUALITY CONTROL

A—LISTINGS BY AUTHORS AND TITLES

Authors and Titles	Issue	Page
ABRUZZI, ADAM: *Determining the AOQL of Single Sampling Plans*	Sept. 1954	14
BICKING, CHARLES A.: *Application of Statistical Techniques to Standardization of Industrial Products (See also correction in Jan. 1955, p. 13)*	Sept. 1954	25
BICKING, CHARLES A. and SIMON, MAJ. GEN. LESLIE E.: *Quality Control—A Top Aid To Top Management*	May 1955	32
BISBEE, R. F.: *Pretesting Packaged Products For Safe Transit—A Vital Phase of Quality Control*	Nov. 1944	30
BLACKWELL, DAVID J.: *Acceptance Sampling*	June 1955	17
BLISS, C. I.: *The Role of a Biometrician in the Pharmaceutical Industry*	Apr. 1955	10
BOYD, D. F.: *Operations Research in Industry*	May 1955	45
BRADLEY, RALPH ALLAN: *Some Notes on the Theory and Application of Rank Order Statistics,*		
Part I	Feb. 1955	12
Part II	Mar. 1955	5
BURR, IRVING W.: *Short Runs*	Sept. 1954	16

F—PROBLEMS DEPARTMENT

Paul C. Clifford and Thomas A. Budne, Co-editors

Issue Page

PROBLEM 11: Mr. J. H. Fairfield of Montreal, Canada asks how one may set 95% confidence limits on process average where the Dodge CSP-1 Continuous Sampling Inspection Plan is being used. Nov. 1954 48

PROBLEM 12: Mr. Robert Laster of the Metropolitan Section remarks on a peculiarity he has noted in the F table and seeks an intuitive rather than mathematical explanation for the phenomenon. Nov. 1954 49

SUGGESTED SOLUTION TO PROBLEM 7: This problem appeared in the July 1952 issue, and is concerned with the distribution of uv, u/v and u^n if u and v are normally distributed. Dr. Leo A. Aroian of Culver City, California discusses in some detail references in the literature dealing with this problem. Nov. 1954 49

PROBLEM 13: Dr. G. Wagner of the Robt. Bosch Co. in Stuttgart, Germany describes a life testing practice for which a variables sampling plan is sought that will provide certain specified protection features. He asks what plans, if any, are in use in the U.S.A. that would meet the situation he describes. May 1955 56

PROBLEM 14: Mr. Paul Berliner of New York City gives two separate situations involving the dependence of the functioning of a vehicle on certain components and raises questions regarding predictions about functioning reliability in terms of given characteristics of the components. May 1955 58

SUGGESTED SOLUTION TO PROBLEM 11: Miss Mary Torrey of New York City and Mrs. Ann Landers of Palo Alto, California suggest solutions to this problem which the editor notes are sufficient if the process is in control. However, he still seeks further help from readers on the general problem as proposed. May 1955 58

SUGGESTED SOLUTION TO PROBLEM 12: The editor presents a solution to the problem proposed by Mr. Laster. May 1955 60

I—FROM THE SCRAP BOX

Issue Page

At the 8th Annual Convention of ASQC in St. Louis, June 1954, there came into the editor's hands by way of Mr. David A. Hill a very excellent little pamphlet published by the Hughes Aircraft Company and entitled "Quality Control as a Threat—or Six Ways to Lose Friends and Aggravate People." This pamphlet (sans illustrations) is published in full as an appropriate item for the Scrap Box, with our thanks to Hughes Aircraft. Sept. 1954 38
